Automation Ver 23.0.3.35 Changes and Improvements

Version 23.0.3

SOD-2018 På mekanisk side: Hvis Anvend projektets indstillinger ved placering af objekter" er slået til, så ændres kun font og farve
SOD-2014 Choosing Relative in the coordinatebox on the mechanical page will also set Z to zero
SOD-2007 DWG/DXF setting/Open drawing would crash in some cases
SOD-2005 Filter mixes up "less than" and "not equal"
SOD-2003 Drag-and-drop of component from portal crashes program if dot is part of the picture file
SOD-1996 Invisible terminals on a DIA page caused that there were missing routings in the Panelrouter.
SOD-1995 Acces to webportal through Automation can not handle all timezones
SOD-1994 Crash and bugs related to Filterpanel
SOD-1991 Crash when importing database, using "contains" filter
SOD-1988 Updating component lists gives not-relevant info about description language settings
SOD-1987 Crash when importing database, using boolean filters
SOD-1986 Predefined PLC symboldatafields cannot beb added with Pre-text. As designed
SOD-1983 The Align function on a Symbol-group, spoiled a symbol group. Is now disabled on Symbol-groups.
SOD-1981 The program used unnessesary time converting symbols when only showing symbol Titles
SOD-1980 Visible in the RDS tab (cable, Signal, Wireno dialogs) should not be shown in the Automation program
SOD-1979 Inserting Notes on empty link-lines results in crash
SOD-1978 Article number was cleared if the symbol contains an article from the symbol library
SOD-1977 Crash: replace subdrawing leads to crash
SOD-1976 Crash: renaming a symbol group may lead to crash
SOD-1975 Mounting assistance crashed when shift from Show not mounted to Show mounted
SOD-1974 Crash when opening Import komponents from V22
SOD-1973 Crash when importing V22 database
SOD-1972 Panelbuilder crashes, if there are no database connected
SOD-1971 Crash when placing PLC
SOD-1969 Crash, when dragging components from portal (by file), into Automation, if not connected to a database
SOD-1968 Crash if no database is connected
SOD-1965 Crash when importing DWG-file
SOD-1964 Crash can happen, in "Update from component database"
SOD-1963 If no mapping are made for Menu-table, a crash can happen in the database-dialog
SOD-1961 Edit symboldatafields module, crashes if no project are open.
SOD-1959 Databaseimport is showing wrong values/data
SOD-1958 Error importing database
SOD-1957 Crash in Drag'n drop from Component portal
SOD-1956 Objekt lister highlights incorrectly when using Symbol data fields
SOD-1955 Syntax error when importing fields with spaces
SOD-1951 Database data fields on cable/terminal/PLC/Net lists is not converted/translated while loading in V23
SOD-1903 Export to DWG: Incorrect first page number while displaying DWG / DXF export
SOD-1882 Component Wizard may crash when clicking Next
SOD-1828 Symbol reference disapear on Main reference symbol when exporting to PDF til PDF and Updating references
SOD-1619 Invalid port number in License setup could lead to crash
SOD-1267 Page menu: When changing the reference name on several pages at a time, RDS on symbols does not change.
AUTO-7843 [Improvement] Possibility to get Panelbuilder components from within PanalBuilder-module
AUTO-7837 [Improvement] Objektlister kan underopdele symbolers datafelter
AUTO-7836 Rediger symbolers datafelter: Håndtering af flere Excelark
AUTO-7835 RedigerSDF-modul: Se ændringer i forhold til aktivt produkt.
AUTO-7832 Osifont replaces the Albertus Medium font

Version 23.0.2

SOD-1953 F4 could course a program crash
SOD-1952 Textfonts like osifont was sometime substituted in pdf export and printing
SOD-1949 Creating a new manufacturer did not always work
SOD-1948 connect Show available PLC to the available address on the reference card using the button I/O addr. could lead to a crash
SOD-1947 Viewer could not open old projects

Version 23.0.1

SOD-1946 Component dialog, accessories, shows correct article number
SOD-1945 'Default to UK' fumction for ie missing manuals on selected language is now working again
SOD-1943 The selection of Article database field was not saved with the project and not in the ini-file
SOD-1942 Selecting PLC I/O Data (right-click) on a PLCreference card (new methode) did not work
SOD-1941 Wrong readressing of PLC reference cards when more than 8 in- or outputs SOD-1938 2 PLCreference cards, e.g. -K1.1 and -K1.2 did not get correct group names
SOD-1937 'All' Text/Symbol defaults are not transferred correctly with the Project Generator. SOD-1936 The Symbol Settings dialog in Symbol Editor is now resizable
SOD-1935 The chosen articlenumver (type) are not always shown when placing a component
SOD-1932 Export dialog size problem on dual monitor with different scale (dpi settings)
SOD-1931 The show available window was not updated when changing Adresses on the PLC-reference symbol
SOD-1928 Layout of datavalues in "Edit record"-dialog, should be improved for number-types.
SOD-1927 Transfer PLC data from Reference symbol failed if reference symbol has no RDS and the I/O symbol has RDS

SOD-1925 Rare crash when 'Show Component' is active

SOD-1924 Crash when dragging from portal, if symbol directory or alias does not exist

SOD-1923 Crash when picking symbol from componentmenu

SOD-1922 Connecting to a database that is not valid for V23, can give crashes

SOD-1921 Crash when selecting component followed by changing the reference designation

SOD-1920 "Change path"-button in URL-links, don't work as expected

SOD-1918 Syncronization between a PLC referensymbol(group) failed

SOD-1917 Database program: When selecting another menu table, the program is searching for an old field name

SOD-1916 Crash when showing hint on accessoryfields in the edit recorddialog.

SOD-1915 Import from v22 database: Attempting to create new custom field failed, if the connected v23 database required user/password

SOD-1914 V22-db-import: Field mappings not always correct, when the user does not use an IDB file

SOD-1913 V22-db-import: Crash if IDB file was used that pointed to a field that did not exist in the table

SOD-1911 Some minnor text display issues in project settings page

SOD-1910 Db22-importer: Crash if user attempts to open text file that does not exist (article number text file)

SOD-1909 Fixed crash in component wizard when changing symbol state in alternative symbol, and when rearranging symbols.

SOD-1908 Part -/Component list: Choose "=+-design." in "Setup/Criteria" press on = sign on the keyboard (crash)

SOD-1906 Terminal list to file: the data field "Cmp. group No." is missing

SOD-1905 In some cases a "Invalid typecast error" was reported when multiple components were imported

SOD-1904 V22-db-import: Import of custom fields did not succeed if the field type was not string

SOD-1901 2 texts in the Mounting assistance function was only English

SOD-1900 A PLCreference group does not ask for a name when placing

SOD-1899 Crash when opening a v22 project if an alternative article number was used (mapped) in the internal project database

SOD-1896 Mixed Portal and user components did not work when using Mechanical placement

SOD-1893 Showing License data in setting or click on Component portal button might raise EConvert Error

SOD-1891 If there is alternatives on PLC then "Place all" does not work on I/O

SOD-1889 'Mechanical load' can only place usr-symbols

SOD-1888 Import from v22 database: File filter for ACCDB was missing in the import dialog

SOD-1887 In some cases the old MANUFACTUR/FABRIKAT is not converted correctly

SOD-1886 Import v22 user settings: the section Libraries is missing (containing links to templates and subdrawings)

SOD-1885 Import of v22 components: v22 DESCRIPT must be imported into both DescriptUK and DescriptUS

SOD-1884 Edit symbol could sometimes create two Save icons in the toolsbar

SOD-1881 PLC-ref symbols: the (new) symbol groups cannot have current path names or page's rds. This is now fixed

SOD-1878 Edited a symbol, from the symbolmenu can take a long time updating symbol-graphic.

SOD-1876 Placing PLC-referencesymbols by "place all", can't handle componentname correctly

AUTO-7832 Osifont replaces the Albertus Medium font

AUTO-7818 Templates and Frames for A0-A3 for house installations have been created AUTO-7801 Lists to file in the Tools menu did not work

AUTO-7785 If no symbols were found in the area the empty dialog looked odd. The Dialog title has now been changed

AUTO-7771 The functionality in "Show terminal row" now works for all terminals
