

Automation Ver 26.0.0.109 Changes and Improvements

Version 26.0.0

SOD-2499 OLE-command PlaceSubdrawing did not return a DidComplete-value
SOD-2496 Multilist export could not handle formatfiles longer than 32 characters
SOD-2487 "Next available" did not give correct name for component/symbol
SOD-2481 Changing accessory in componentdialog did not always work
SOD-2476 Optional accessory, unwanted change may happen
SOD-2474 Projectgenerator can crash, if no projects are open
SOD-2473 Mixed CompGroupNumbers when copying and pasting a page
SOD-2464 Automation can handle more pictures in projects before out of memory occurs.
SOD-2452 Clicking OK when changing articlenumber on component can lead to double articlenumber. Therefor a new warning popup is added
SOD-2423 Translation missing in import V22 database
SOD-2415 DescriptUK is missing under "Components/Component Portal Settings"
SOD-2414 Copy terminals, when only renaming connections
SOD-2410 Componentmenu, "available symbols" can be out of screen coordinates
SOD-2353 Table of content: Listesetup don't save to and from page
SOD-1831 Rename terminals: Renaming terminals and connections failed
AUTO-8352 Popup to inform about new component kind in CW (Disitribution blocks)
AUTO-8351 [Improvement] Middle Potential must be added to default installation
AUTO-8336 'Place all' in Component menu/pick menu now includes accessories
AUTO-8332 [Improvement] List of manufacturers is now updated automatically every day
AUTO-8331 [Improvement] Symbols from pcsSymbols-xxx are now used default in the componentwizard
AUTO-8315 Kabelsymboler: Man skal kunne sætte symboldatafelter FRA og TIL på kabelsymboler
AUTO-8312 Copying multiple symbols does not handle accessories correctly
AUTO-8302 [Improvement] Load project, checks and fixes component object issues
AUTO-8220 Insert project in project (and merge with Project Generator) did not handle accessories correctly
AUTO-8174 [Improvement] Visualization of "no symbols" in "Available"-window
AUTO-7861 [Improvement] The Panelrouter could not accept different CompGroupNo between dia-page and mec-page (Accesorries have same name but different type and CompGroupNo)
